This visualization shows the **marriage rate by state in Australia (2024)** using a choropleth map.

- The **color intensity** represents the marriage rate (per 1,000 population, age 16+).
- The **tooltip** provides additional information, including both marriage rate and divorce rate for each state/territory.
- The map is based on ABS *Marriages & Divorces 2024* dataset.

This visualization allows quick comparison of marriage patterns across Australian states and highlights differences between regions.
